Foreword 2

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Principle 7
4.1 General 7
4.2 Amplification, detection and confirmation of PCR products 7
4.3 Quantitation of PCR products 7

5 Reagents 7

6 Apparatus and equipment 7

7 Guidelines concerning the procedure 8
7.1 General 8
7.2 Target sequence stability 8
7.3 Calibration of the analysis 8
7.4 Quantitation considerations 8
7.5 Quality assurance requirements 8

8 Interpretation 9

9 Expression of results 9

10 Test report 10

Annex A (informative) Target taxon-specific methods 11

A.1 Target taxon-specific method for the absolute quantitation of the adh1 gene DNA of maize using real-time PCR 11

Annex B (informative) Screening methods 17

B.1 Screening method for the relative quantitation of the 35S-promoter DNA of soya bean line GTS 40-3-2 using real-time PCR 17

Annex C (informative) Construct-specific methods 25

C.1 Construct-specific method for the quantitation of soya bean line GTS 40-3-2 DNA using real-time PCR (Method 1) 25
C.2 Construct-specific method for the quantitation of soya bean line GTS 40-3-2 DNA using real-time PCR (Method 2) 32
C.3 Construct-specific method for the quantitation of Event176 maize DNA using real-time PCR 39

C.4 Construct-specific method for the quantitation of soya bean line GTS 40-3-2 DNA using real-time PCR 46
C.5 Construct-specific method for the quantitation of maize line MON 810 DNA using real-time PCR 54
C.6 Construct-specific method for the quantitation of maize line Event176 DNA using real-time PCR 61
C.7 Construct-specific method for the quantitation of maize line Bt11 DNA using real-time PCR 68
C.8 Construct-specific method for the quantitation of maize line GA21 DNA using real-time PCR 76
C.9 Construct-specific method for the quantitation of maize line T25 DNA using real-time PCR 83

Annex D (informative) Event-specific methods 92

D.1 Event-specific method for the absolute and relative quantitation of maize line Bt11 DNA based on real-time PCR 92
D.2 Event-specific method for the relative quantitation of maize line MON 810 DNA using real-time PCR 98
