

DIN EN ISO 21187:2006-01 (E)

Milk - Quantitative determination of bacteriological quality - Guidance for establishing and verifying a conversion relationship between routine method results and anchor method results (ISO 21187:2004)

Contents		Page
Foreword		2
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Principles	6
4.1	Prerequisites	6
4.2	Organizational set-up	6
5	Establishing a conversion relationship	7
5.1	Consideration of influencing factors and their consequences	7
5.2	Test samples	8
5.3	Pretreatment of test samples	9
5.4	Analysis	10
5.5	Calculation	11
5.6	Expression of results	11
6	Verification of a conversion relationship	12
6.1	Frequency of verification	12
6.2	Test samples	12
6.3	Pretreatment of test samples	8
6.4	Analysis	12
6.5	Calculation and verification of a conversion relationship	12
7	Test report	13
Annex A (informative) Number of samples for linear regression		14
Bibliography		17
