ISO/TS 19036:2006-02 (E)

Microbiology of food and animal feeding stuffs - Guidelines for the estimation of measurement uncertainty for quantitative determinatio ns

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1

3 Principles 3
3.1 Global approach for the estimation of measurement uncertainty (MU) 3
3.2 Consideration of bias 3

4 General aspects 4
4.1 Combined standard uncertainty 4
4.2 Standard deviation of reproducibility 4
4.3 Expanded uncertainty 4
4.4 General rules for the estimation of the reproducibility standard deviation 4

5 Intralaboratory standard deviation of reproducibility 5
5.1 General 5
5.2 Experimental protocol 5
5.3 Calculations 7

6 Reproducibility standard deviation of the method derived from an interlaboratory study 8
6.1 General 8
6.2 Use in food microbiology 9

7 Reproducibility standard deviation derived from an interlaboratory proficiency trial 10

8 Expression of measurement uncertainty in the test reports 10

Annex A (informative) Results of trials on the uncertainty component linked to the sub-sampling of test portion and to the preparation of the initial suspension 11
