ISO 9612:2009-04 (E)

Acoustics - Determination of occupational noise exposure - Engineering method

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 4

5 Instrumentation 5

6 Methodology -- Chronological steps 6

7 Work analysis 7

8 Selection of measurement strategies 8

9 Strategy 1 -- Task-based measurement 9

10 Strategy 2 -- Job-based measurement 12
11 Strategy 3 -- Full-day measurement 14
12 Measurements 15
13 Sources of uncertainty 17
14 Calculation of measurement uncertainties and presentation of the final results 19
15 Information to be reported 19

Annex A (informative) Example of a checklist to ensure that significant noise events are detected during the work analysis 21

Annex B (informative) Guide to the selection of measurement strategy 22

Annex C (normative) Evaluation of measurement uncertainties 25

Annex D (informative) An example showing calculation of daily noise exposure level using task-based measurements 33

Annex E (informative) An example showing calculation of daily noise exposure level using job-based measurements 37

Annex F (informative) Sample calculation of daily noise exposure level using full-day measurements 40

Bibliography 43
