## Acoustics - Determination of occupational noise exposure - Engineering method

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	4
5	Instrumentation .....	5
6	Methodology -- Chronological steps .....	6
7	Work analysis .....	7
8	Selection of measurement strategies .....	8
9	Strategy 1 -- Task-based measurement .....	9
10	Strategy 2 -- Job-based measurement .....	12
11	Strategy 3 -- Full-day measurement .....	14
12	Measurements .....	15
13	Sources of uncertainty .....	17
14	Calculation of measurement uncertainties and presentation of the final results .....	19
15	Information to be reported .....	19
Annex A (informative) Example of a checklist to ensure that significant noise events are detected during the work analysis .....		21
Annex B (informative) Guide to the selection of measurement strategy .....		22
Annex C (normative) Evaluation of measurement uncertainties .....		25
Annex D (informative) An example showing calculation of daily noise exposure level using task-based measurements .....		33
Annex E (informative) An example showing calculation of daily noise exposure level using job-based measurements .....		37
Annex F (informative) Sample calculation of daily noise exposure level using full-day measurements .....		40
Bibliography .....		43
