

ISO 9612:2009-04 (E)

Acoustics - Determination of occupational noise exposure - Engineering method

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols	4
5 Instrumentation	5
6 Methodology -- Chronological steps	6
7 Work analysis	7
8 Selection of measurement strategies	8
9 Strategy 1 -- Task-based measurement	9
10 Strategy 2 -- Job-based measurement	12
11 Strategy 3 -- Full-day measurement	14
12 Measurements	15
13 Sources of uncertainty	17
14 Calculation of measurement uncertainties and presentation of the final results	19
15 Information to be reported	19
Annex A (informative) Example of a checklist to ensure that significant noise events are detected during the work analysis	21
Annex B (informative) Guide to the selection of measurement strategy	22
Annex C (normative) Evaluation of measurement uncertainties	25
Annex D (informative) An example showing calculation of daily noise exposure level using task-based measurements	33
Annex E (informative) An example showing calculation of daily noise exposure level using job-based measurements	37
Annex F (informative) Sample calculation of daily noise exposure level using full-day measurements	40
Bibliography	43
