## Acoustics - Framework for calculating a distribution of sound exposure levels for impulsive sound events for the purposes of environmental noise assessment

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Basic equations .....	6
4.1	General .....	6
4.2	Probability of occurrence .....	6
4.3	Band sound exposure level .....	7
4.4	Frequency-weighted sound exposure level .....	8
4.5	Long-term average single-event sound exposure level .....	8
4.6	Equivalent level from multiple events .....	10
5	Calculation of a statistical distribution .....	10
6	Calculation of attenuation .....	14
6.1	General .....	14
6.2	Geometric divergence .....	14
6.3	Atmospheric absorption .....	14
6.4	Insertion loss by screening objects .....	15
6.5	Terrain shielding .....	15
6.6	Contributions to excess attenuation .....	16
6.6.1	General .....	16
6.6.2	Refraction .....	16
6.6.3	Ground reflection and absorption .....	17
7	Classification .....	19
7.1	General .....	19
7.2	Classification of atmospheric absorption .....	19
7.3	Classification of excess attenuation .....	19
7.3.1	General .....	19
7.3.2	Lookup table requirements .....	20
7.3.3	Range-dependent sound speed profiles .....	21
7.3.4	Directed sound speed profiles .....	21
8	Probability of occurrence of sound speed profiles .....	22
8.1	General .....	22
8.2	Using direct measurements of wind and temperature profiles .....	22
8.3	Similarity relationships for the atmospheric surface layer .....	23
8.4	Using measurements of turbulent fluxes .....	24
8.5	Using routinely gathered weather station data .....	25
8.6	Using directly measured or calculated sound speed profiles as input .....	26
9	The source .....	26
9.1	General .....	26
9.2	Demolition and muzzle blasts .....	26

9.2.1	General .....	26
9.2.2	Source descriptors .....	27
9.2.3	Determination by measurement .....	27
9.2.4	Determination by estimation .....	28
9.3	Projectile sound .....	28
9.3.1	General .....	28
9.3.2	Flat trajectories .....	28
9.3.3	High-elevation trajectories and rocket trajectories .....	28
10	Uncertainties .....	28
Annex A (informative) Example of the estimation of the statistical distribution of single-event sound exposure levels .....		30
Annex B (informative) Uncertainty .....		37
Bibliography .....		40
