

DIN EN ISO 12001:2010-01 (E)

Acoustics - Noise emitted by machinery and equipment - Rules for the drafting and presentation of a noise test code (ISO 12001 :1996)

Contents	Page
Foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Definitions	6
4 Classification of different types of noise	10
5 Classification of the accuracy grade of measurement methods	10
5.1 Survey grade (grade 3)	10
5.2 Engineering grade (grade 2)	10
5.3 Precision grade (grade 1)	11
6 Selection of B-types standards for use in noise test codes	11
6.1 General	11
6.2 Methods for determining sound power levels	11
6.3 Methods for the determination of emission sound pressure levels at work stations and at other specified positions	11
6.4 Methods for declaring and verifying noise emission values	12
6.5 Requirements with respect to the method and accuracy grade	12
7 Requirements for the contents of a noise test code	12
7.1 Description of a family of machines	12
7.2 Noise emission	12
7.3 Installation and mounting conditions	13
7.4 Operating conditions	14
7.5 Measurement uncertainties	14
7.6 Information to be recorded	15
7.7 Information to be reported	15
7.8 Declaration and verification of noise emission values	15
Annex A (normative) Basic noise emission standards	17
Annex B (normative) Items to be covered in a noise test code	19
Annex C (informative) Noise emission quantities	20
Annex D (informative) Bibliography	21
