## Mechanical vibration and shock - Vibration of fixed structures - Guidelines for the measurement of vibrations and evaluation of their effects on structures

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Source-related factors to be considered .....	2
5	Structure-related factors to be considered .....	3
6	Quantities to be measured .....	4
7	Frequency range and vibration amplitude .....	5
8	Instrumentation .....	5
9	Position and mounting of transducers .....	7
10	Data collection, analysis and assessment .....	10
11	Methods of measurement and reporting .....	12
12	Evaluation of vibration responses .....	14
Annex A (informative) Values of structural response .....		16
Annex B (informative) Classification of buildings .....		18
Annex C (informative) Random data .....		23
Annex D (informative) Predicting natural frequencies and damping of buildings .....		24
Annex E (informative) Vibrational interaction of the foundation of a structure and the soil .....		30
Bibliography .....		36
