

ISO 28961:2012-01 (E)

Acoustics - Statistical distribution of hearing thresholds of otologically normal persons in the age range from 18 years to 25 years under free-field listening conditions

Contents

Page

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Calculation of percentiles of hearing threshold distribution	2
3.1 General	2
3.2 Threshold distribution at frequencies lower than 10 000 Hz	2
3.3 Threshold distribution at 10 000 Hz and higher frequencies	4
Annex A (informative) Numerical examples to illustrate the procedure	5
Annex B (informative) Selected values of the statistical distribution of hearing thresholds of otologically normal persons in the age range 18 years to 25 years inclusive	6
Annex C (informative) Selected values of z_x	9
Annex D (informative) Notes on the derivation of the statistical distribution of normal hearing thresholds	10
Bibliography	11
