Methods for the calibration of vibration and shock transducers - Part 42: Calibration of seismometers with high accuracy using acceleration of gravity

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Traceability of measurement	1
4	Determination of local gravity	2
4.1	Method using absolute gravimeter	2
4.2	Method using gravitational acceleration standardization network and relative gravimeter ..	2
4.3	Method using gravitational acceleration standardization network	2
5	Requirements for apparatus and environmental conditions	2
5.1	Calibration environment	2
5.2	Base and vibration environment (seismic block for calibration apparatus)	2
5.3	Voltage-measuring instrumentation	2
5.4	Tuneable low-pass filter	3
5.5	Power supply	3
5.6	Tilt table	3
6	Method	3
6.1	Calibration principle	3
6.2	Calibration procedure	5
7	Expression of results	6
Annex A (normative) Expression of uncertainty of measurement in calibration		7
Annex B (informative) Traceability of calibration measurement of seismometer		8
Bibliography		9
