

DIN EN 16703:2015-12 (E)

Acoustics - Test code for drywall systems of plasterboard with steel studs - Airborne sound insulation

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Test code for drywall systems of plasterboard with steel studs	7
4.1	Application	7
4.2	Testing Guidelines	7
4.2.1	Test element	7
4.2.2	Boundary and mounting conditions	7
4.2.3	Test report	8
4.3	Validation of the laboratory with two reference test partitions	8
4.3.1	Test elements	8
4.3.2	Acceptance criteria	8
4.3.3	Remedial investigation	10
4.4	Application of uncertainties	11
Annex A (normative) Reference test partition location in aperture		12
A.1	General	12
A.2	Case A "Aperture without niche and one acoustic break"	12
A.3	Case B "Aperture without niche and two acoustic breaks with Ratio 2:1"	13
A.4	Case C "Aperture with niche and one acoustic break"	13
Annex B (normative) Reference test partition Type 1		14
B.1	Description of Reference test partition Type 1	14
B.1.1	Single Framework, single board layer partition	14
B.2	Installation procedure of partition Type 1	15
B.2.1	Installation of framework with channels and studs	15
B.2.2	Installation of plasterboards 1st side	16
B.2.3	Installation of insulation in cavity	16
B.2.4	Installation of plasterboards 2nd side	16
B.2.5	Jointing for both sides of the partition	16
Annex C (normative) Reference test partition Type 2		18
C.1	Twin framework, double board layer partition	18
C.1.1	General	18
C.1.2	Installation of framework with channels and studs	19
C.2	Installation of plasterboards	20
C.2.1	General	20
C.2.2	Plasterboard inner layer on first side	20
C.2.3	Plasterboard outer layer on first side	20
C.3	Installation of insulation in cavity	21
C.4	Installation of plasterboards 2nd side - Plasterboard inner layer on second side	21

C.5	Plasterboard outer layer on second side	21
C.6	Jointing for both sides of the partition	21
Annex D (informative)	Interlaboratory Tests performed for the development of this Test Code standard	22
Annex E (informative)	E Modulus - Control Method (static E Modulus with 3 bending points)	24
Annex F (informative)	E Modulus - Expertise Method (dynamic E Modulus)	25
Bibliography	27
