ISO 10534-1:1996-12 (E)

Acoustics - Determination of sound absorption coefficient and impedance in impedance tubes - Part 1: Method using standing wave ratio

Contents

Page

1 Scope 1

2 Normative references 1

3 Definitions 2

4 Principle 3

5 Fundamentals 3

6 Test equipment 5

7 Preliminary tests and measurements 10

8 Mounting of the test sample 10

9 Test methods 10

10 Transformation of reflection factor and impedance 11

11 Test report 12

Annexes

A Preliminary measurements 14

B Verification of the test equipment 17

C Pressure-release termination of test sample 19

D Determination of diffuse sound absorption coefficient α_{st} of locally reacting absorbers 20
