European foreword	4
Foreword	5
Introduction	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	8
4 Instrumentation	11
4.1 General	11
4.2 Calibration	11
4.3 Verification	11
5 Frequency range	11
5.1 Tapping machine as the impact source	11
5.2 Rubber ball as the impact source	12
6 General	12
7 Default procedure for sound pressure level measurement	13
7.1 General	13
7.2 Generation of sound field	13
7.2.1 General	13
7.2.2 Impact source positions for the tapping machine as impact source	13
7.2.3 Impact source positions for the rubber ball as impact source	14
7.3 Fixed microphone positions for the tapping machine or rubber ball as impact source	14
7.3.1 General	14
7.3.2 Number of measurements	14
7.3.3 Tapping machine operated at more than one position	14
7.3.4 Rubber ball operated at more than one position	15
7.4 Mechanized continuously-moving microphone for the tapping machine as impact source	15
7.4.1 General	15
7.4.2 Number of measurements	15
7.4.3 Tapping machine operated at more than one position	16
7.5 Manually-scanned microphone for the tapping machine as impact source	16
7.5.1 General	16
7.5.2 Number of measurements	16
7.5.3 Tapping machine operated at more than one position	16
7.5.4 Circle	16
7.5.5 Helix	16
7.5.6 Cylindrical-type	16
7.5.7 Three semicircles	17
7.6 Minimum distances for microphone positions	18
7.7 Averaging times for the tapping machine as impact source	18
7.7.1 Fixed microphone positions	18
7.7.2 Mechanized continuously-moving microphone	18
7.7.3 Manually scanned microphone	18
7.8 Calculation of energy-average sound pressure levels	18
7.8.1 Fixed microphone positions for the tapping machine as impact source	18
7.8.2 Mechanized continuously-moving microphone and manually-scanned microphone for the tapping machine as impact source	19
7.8.3 Fixed microphone positions for the rubber ball as impact source	19

8	Low-frequency procedure for sound pressure level measurement for the tapping machine as impact source	19
8.1	General.....	19
8.2	Generation of sound field.....	19
	8.2.1 General.....	19
	8.2.2 Impact source positions.....	20
8.3	Microphone positions.....	20
8.4	Averaging time.....	21
8.5	Calculation of low-frequency energy-average impact sound pressure levels.....	21
9	Background noise (default and low-frequency procedure)	21
9.1	General.....	21
9.2	Correction to the signal level for background noise.....	22
10	Reverberation time in the receiving room (default and low-frequency procedure)	22
10.1	General.....	22
10.2	Generation of sound field.....	23
10.3	Default procedure.....	23
10.4	Low-frequency procedure.....	23
10.5	Interrupted noise method.....	24
10.6	Integrated impulse response method.....	24
11	Conversion to octave bands	24
12	Expression of results	24
13	Uncertainty	25
14	Test report	25
	Annex A (normative) Impact sources	26
	Annex B (normative) Requirements for loudspeakers used for reverberation time measurements	32
	Annex C (informative) Forms for the expression of results	33
	Annex D (informative) Additional guidance	37
	Annex E (informative) Horizontal measurements — Examples of suitable impact source and microphone positions	41
	Annex F (informative) Vertical measurements — Examples of suitable impact source and microphone positions	45
	Bibliography	48
