ISO 10843:1997-09 (E)

Acoustics - Methods for the description and physical measurement of single impulses or series of impulses

Contents

Page

1 Scope 1

2 Normative references 1

3 Definitions 2

4 Measurement system characteristics and requirements 5

5 Measurements 9

6 Data presentation 10

Annexes A Signal handling limitations in transient measurement and analysis 13

B Methods for the large-amplitude impulse calibration of microphones 15

C Determination of measurement system ciiaracteristics 19

D Time-weigiiting ciiaracteristics and tolerances: S and F 20

E Bibliography 21
