

# ISO 11819-2:2017-03 (E)

## Acoustics - Measurement of the influence of road surfaces on traffic noise - Part 2: The close-proximity method

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | v           |
| Introduction ..... |  | vi          |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....   | 2           |
| 3                  | Terms and definitions .....  | 2           |
| 3.1                | Road and pavement related definitions .....                          | 2           |
| 3.2                | Measurement methods and equipment .....                              | 2           |
| 3.3                | Acoustic quantities and symbols .....                                | 3           |
| 3.4                | Symbols used for correction terms .....                              | 4           |
| 4                  | Symbols and abbreviated terms .....                                  | 4           |
| 5                  | Measurement principle .....  | 6           |
| 6                  | Measuring instruments .....  | 6           |
| 6.1                | Sound level instrumentation .....                                    | 6           |
| 6.2                | Frequency analysis instrumentation .....                             | 7           |
| 6.3                | Sound calibration instrumentation .....                              | 7           |
| 6.4                | Vehicle speed measuring instrumentation .....                        | 7           |
| 6.5                | Position monitoring instrumentation .....                            | 7           |
| 6.6                | Temperature measuring instrumentation .....                          | 7           |
| 6.7                | Tyre load measuring equipment .....                                  | 7           |
| 6.8                | Inflation pressure measuring equipment .....                         | 7           |
| 6.9                | Verification of measuring system and measuring instrumentation ..... | 7           |
| 7                  | Test sites .....   | 8           |
| 8                  | Meteorological conditions .....                                      | 8           |
| 8.1                | Wind .....   | 8           |
| 8.2                | Temperature and other weather-related issues .....                   | 8           |
| 9                  | Test vehicle .....   | 9           |
| 9.1                | General design .....   | 9           |
| 9.2                | Microphone positions and mounting .....                              | 9           |
| 9.3                | Performance requirements and conformity of the test vehicle .....    | 11          |
| 9.4                | Reference tyres .....  | 11          |
| 9.5                | Tyre rubber hardness .....   | 11          |
| 9.6                | Tyre mounting .....  | 11          |
| 9.7                | Tyre run-in .....  | 12          |
| 10                 | Measurement procedure .....  | 12          |
| 10.1               | Preparations for measurements .....                                  | 12          |
| 10.2               | Measurement of sound .....   | 12          |
| 10.3               | Procedure for study of typical road section .....                    | 12          |
| 10.4               | Minimum number of runs for very short road sections .....            | 13          |
| 10.5               | Lateral position on the road .....                                   | 13          |
| 10.6               | Longitudinal position on the road .....                              | 13          |

|                       |  |    |
|-----------------------|--|----|
| 10.7                  | Consideration of disturbing noise .....  | 13 |
| 10.8                  | Test vehicle speed .....   | 13 |
| 10.8.1                | Reference speeds .....   | 13 |
| 10.8.2                | Test speed and acceptable deviations .....   | 13 |
| 10.9                  | Tyre loads .....   | 14 |
| 10.10                 | Tyre inflation .....   | 14 |
| 10.11                 | Temperature measurement .....  | 14 |
| 10.11.1               | General .....  | 14 |
| 10.11.2               | Air temperature .....  | 15 |
| 10.11.3               | Road surface temperature (optional) .....  | 15 |
| 10.12                 | Overview and summary .....   | 15 |
| 11                    | Analysis procedure .....   | 15 |
| 11.1                  | Definition of steps in the calculation process .....                               | 15 |
| 11.2                  | Results expressed as overall levels .....  | 16 |
| 11.2.1                | General .....  | 16 |
| 11.2.2                | Case A .....   | 17 |
| 11.2.3                | Case B .....   | 17 |
| 11.2.4                | Expression of CPX levels .....   | 17 |
| 11.3                  | Results expressed as one-third-octave-band levels .....                            | 18 |
| 11.3.1                | General .....  | 18 |
| 11.3.2                | Case A .....   | 18 |
| 11.3.3                | Case B .....   | 18 |
| 11.4                  | Correction for analysis of spectral levels .....                                   | 18 |
| 11.5                  | Acoustic variability .....   | 18 |
| 12                    | Measurement uncertainty assessment according to ISO/IEC Guide 98-3 .....           | 19 |
| 13                    | Repeatability and reproducibility: System comparison according to ISO 5725-2 ..... | 21 |
| 14                    | Test report .....  | 21 |
| Annex A (normative)   | Certification of the test vehicle .....  | 24 |
| Annex B (normative)   | Averaging within each road segment .....   | 30 |
| Annex C (informative) | Detailed explanation of the calculation procedure .....                            | 32 |
| Annex E (informative) | Guidelines for design and use of the test vehicle .....                            | 39 |
| Annex F (informative) | Guidelines for measurements .....  | 43 |
| Annex G (informative) | Application of the CPX method for surveying large road networks .....              | 45 |
| Annex H (informative) | Application of the CPX method for other objectives .....                           | 48 |
| Annex I (informative) | Summary of measurement parameters .....  | 49 |
| Annex J (informative) | Validity and stability of the method .....   | 50 |
| Annex K (informative) | Measurement uncertainty .....  | 53 |
| Annex L (informative) | Reference road surface .....   | 56 |
| Annex M (informative) | Calculation of close-proximity sound indices .....                                 | 58 |
| Annex N (informative) | Summary of measuring and data-processing procedures .....                          | 59 |
| Annex O (informative) | Example of test report .....   | 61 |
| Bibliography          | .....  | 64 |
