## Acoustics - Methods for calculating loudness - Part 1: Zwicker method

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Specification of input signal and instrumentation .....	4
5	Method for stationary sounds .....	5
5.1	General .....	5
5.2	Description of the method .....	6
5.3	Calculation of loudness and loudness level .....	9
6	Method for time-varying sounds .....	12
6.1	General .....	12
6.2	Description of the method .....	13
6.3	Calculation algorithm .....	14
6.4	Guidance for determining the loudness of time-varying sounds .....	15
7	Reporting data .....	16
Annex A (normative)	Numerical details and program code for the calculation of loudness of stationary and time-varying sounds (test implementation) .....	17
Annex B (normative)	Test signals for the validation of implementation .....	45
Annex C (informative)	Graphical user interface for the calculation of loudness of stationary and time-varying sounds .....	48
Annex D (informative)	Guidance for determining the loudness when using head and torso simulator microphones .....	53
Annex E (informative)	Uncertainty considerations .....	54
Bibliography .....		57
