

ISO 16079-1:2017-11 (E)

Condition monitoring and diagnostics of wind turbines - Part 1: General guidelines

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Overview of condition monitoring procedure implementation -- Set-up and diagnostics requirements		3
5 FMECA: Identification of failure modes, their effects and criticality		6
5.1 Overview		6
5.2 Identification of wind turbine components criticality factor, fCR		7
5.3 Identification of failure mode priority factor, fFMP		9
5.4 Calculating the monitoring priority number, nMP		10
Annex A (informative) P-F interval, ETT and RUL		12
Annex B (informative) Example of FMECA analysis for a wind turbine drivetrain		15
Annex C (informative) List of wind turbine components and their failure modes		18
Annex D (informative) Brief introduction to the concept of FMECA analysis		21
Bibliography		23
