DIN EN ISO 11690-2:1997-02 (E)

Recommended practice for the design of low-noise workplaces containing machinery - Part 2: Noise control measures (ISO 11690-2:1996)

Contents

		Page
1	Scope	4
2	Normative reference	4
3	Definitions	4
4	Technical aspects of noise control	4
5	Noise control at source	5
6	Noise control on the transmission path	9
7	Noise control at the work station	11
8	Verification methods	11
9	New technologies	13
Annexes		
A	Modification or replacement of machine components	14
B	Arrangement of sound sources	15
C	Enclosures	15
D	Silencers	17
E	Noise barriers and screens in rooms	17
F	Acoustical treatment of surfaces	18
G	Structure-borne sound insulation	19
H	Airborne sound insulation of partitions	20
I	Noise control at the work station	20
J	Example of a new technology	21
K	Bibliography	23
