ISO 20189:2018 (E)

Acoustics — Screens, furniture and single objects intended for interior use — Rating of sound absorption and sound reduction of elements based on laboratory measurements

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Methods to measure and evaluate various interior acoustic products

- 4.1 Single objects
- 4.1.1 General
- 4.1.2 Single object sound absorption
- 4.2 Desk screens
- 4.3 Floor screens
- 4.3.1 General
- 4.3.2 Floor screen sound absorption
- 4.3.3 Floor screen sound attenuation
- 4.3.4 Floor screen sound insulation
- 4.4 Furniture ensembles
- 4.4.1 General
- 4.4.2 Furniture ensembles sound absorption
- 4.5 Single objects that are tightly connected to form a surface greater than or equal to 10 m2
- 4.6 Other single objects

5 Statement of results

- 5.1 Results for sound absorption
- 5.2 Results for floor screen sound attenuation
- 5.3 Results for sound insulation
- 5.4 Other information to be reported

Annex A (normative) Presentation of equivalent sound absorption area

Annex B (normative) Examples for the deduction of object sound absorption coefficient, αobj

- B.1 General
- B.2 Example for a desk screen or a floor screen
- B.3 Example for a furniture ensemble, sofas, chairs and similar
- B.4 Example for a cupboard or a bookshelf
- B.5 Example for volume element
- B.6 Example for a desk

Annex C (normative) Presentation of floor screen sound attenuation

Annex D (normative) Presentation of screen sound insulation

Annex E (normative) Mounting conditions in the laboratory

- E.1 Single objects
- E.1.1 Desk screens, type I mounting
- E.1.2 Floor screens, type II mounting
- E.1.3 Furniture ensembles, type III mounting

E.1.4 Single sound absorbers aimed for walls, type IV mounting
E.1.5 Hanging flat elements, type V mounting
E.1.6 Volume elements, type VI mounting
E.1.7 Sofas, type VII mounting
E.1.8 Chairs/containers/stools, type VIII mounting
E.1.9 Bookshelves and cupboards, type IX mounting
E.1.10 Carpets and rugs
E.2 Single objects that are tightly connected to a surface greater than or equal to 10 m2
E.2.1 Whole or partial wall covering, floor coverings
E.2.2 Draperies, curtains and connected panels
E.2.3 Operable walls with absorbing covering

Annex F (informative) Guidelines on suitable values for sound insulation for different screen heights
