ISO 6070:2019-09 (E)

Auxiliary tables for vibration generators - Methods of describing equipment characteristics

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols 2

5 Vibration values 3

6 Auxiliarytableconfigurations 3
6.1 General 3
6.2 Typical designs of the head expander 4
6.2.1 General 4
6.2.2 Expander with linear bearing guidance and air spring support 5
6.2.3 Expander with hydrostatic bearing guidance and air spring supports 5
6.2.4 Bare head expander 5
6.3 Typical designs of the slip table 5
6.3.1 General 5
6.3.2 Hydrostatic bearing table 5
6.3.3 Flat spring table 6
6.3.4 Oil or air cushion table 6
6.3.5 Mechanical slide table 6
6.3.6 Ball, roller or needle bearing table 6
6.3.7 Hydraulic slide table 6
6.3.8 Magnetic bearing table 6
6.3.9 Dry bearing table with hydrostatic compensation 6
6.4 Axis systems 7
6.4.1 Moving table reference axis system 7
6.4.2 Other moving table reference axis systems 8

7 Auxiliary table characteristics 8
7.1 General 8
7.2 Characteristics 8
7.2.1 Effective travel 8
7.2.2 Rated frequency range 8
7.2.3 Rated RMS velocity vz 8
7.2.4 Static load (limit) Fs 8
7.2.5 Static load (limit) per unit area Fp 8
7.2.6 Limiting axial forces 8
7.2.7 Limiting pitching torque C 8
7.2.8 Limiting rolling torque C 9
7.2.9 Limiting yawing torque C 9
7.2.10 Transmissibility 9
7.2.11 Total harmonic distortion of acceleration 9
7.2.12 Environmental limits 9
7.2.13 Load mounting insert pattern 9

8 Test loads 10

9 Characteristics to be supplied by the manufacturer 10

10 Measurement of common dynamic characteristics 15
10.1 Plotting of the acceleration transmissibility function 15
10.2 Measurement of transverse accelerations 15
10.2.1 No-load condition 15
10.2.2 Loaded condition 15
10.3 Measurement of test table acceleration field uniformity 16
10.4 Measurement of acceleration distortion 16

10.5 Measurement of parasitic rotations 16

11 Operating instructions 16

Bibliography 18
