## ISO 26101-1:2021 (E)

# Acoustics — Test methods for the qualification of the acoustic environment — Part 1: Qualification of free-field environments

### Contents

Foreword

#### Introduction

- 1 Scope
- 2 Normative references
- 3 Terms and definitions
- 4 Allowable deviations from inverse square law
- 5 Measurement of free sound field performance
  - 5.1 Divergence loss method
  - 5.1.1 Principle
  - 5.1.2 Instrumentation and measuring equipment
  - 5.1.2.1 General
  - 5.1.2.2 Test sound source
  - 5.1.3 Location of test sound sources and microphone traverses
  - 5.1.3.1 Test sound source location
  - 5.1.3.2 Microphone traverses
  - 5.1.4 Test procedure
  - 5.1.4.1 Qualification bandwidth
  - 5.1.4.2 Generation of sound
  - 5.1.4.3 Measurement of sound pressure level
  - 5.1.5 Expression of results
  - 5.1.5.1 Method of calculation
  - 5.1.5.1.1 General
  - 5.1.5.1.2 Formula for estimation of sound pressure levels based on the inverse square law
  - 5.1.5.1.3 Deviations from the inverse square law
  - 5.1.6 Measurement uncertainty
  - 5.2 Information to be recorded
  - 5.3 Information to be reported

Annex A (normative) Qualification criteria and measurement requirements

- A.1 General
- A.2 Deviations from the inverse square law
- A.3 Location of test sound sources and microphone traverses
- A.3.1 Test sound source location
- A.3.2 Microphone traverses
- A.4 Test procedure
- A.4.1 Qualification bandwidth
- A.4.2 Generation of sound
- A.4.2.1 General
- A.4.2.2 Pure tone test signals
- A.4.2.3 Broad-band test signals
- A.4.3 Spatial resolution of the measurement points

#### Annex B (normative) General procedure for evaluation of test sound source directionality

- B.1 General
- B.2 Installation of the test sound source
- B.3 Test procedure
- B.3.1 Generation of sound

- B.3.2 Measurement of sound pressure level
- B.4 Test sound source directionality

#### Annex C (informative) Measurement uncertainty

- C.1 General
- C.2 Expression for the calculation of deviations from the inverse square law
- C.3 Contributions to measurement uncertainty

#### Annex D (informative) Guidelines for referring to this test method

- D.1 General
- D.2 Qualification criteria
- D.3 Location of test sound sources and microphone traverses
- D.3.1 Test sound source location
- D.3.2 Microphone traverses
- D.4 Test procedure
- D.4.1 Qualification bandwidth
- D.4.2 Generation of sound
- D.4.3 Spatial resolution of the measurement points
