ISO/TS 10811-2:2000-06 (E)

Mechanical vibration and shock - Vibration and shock in buildings with sensitive equipment - Part 2: Classification

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Vibration wave forms 2

4 Classification 2
4.1 General 2
4.2 Classification procedure 2

5 Numbers for displacement and acceleration lines 3

6 Designation of the environmental vibration condition in buildings 3

7 Connection with IEC 60721 and VC curves 4

Annex A (informative) Example of a classification procedure 5
