

ISO/TS 10811-2:2000-06 (E)

Mechanical vibration and shock - Vibration and shock in buildings with sensitive equipment - Part 2: Classification

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Vibration wave forms	2
4	Classification	2
4.1	General	2
4.2	Classification procedure	2
5	Numbers for displacement and acceleration lines	3
6	Designation of the environmental vibration condition in buildings	3
7	Connection with IEC 60721 and VC curves	4
Annex A (informative) Example of a classification procedure		5
Bibliography		10
