Mechanical vibration - Uncertainty of the measurement and evaluation of human exposure to vibration

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Considerations regarding the uncertainty of vibration measurements	7
4.1	Measurement objectives and fixed parameters	7
4.2	Types of uncertainties	8
4.3	Measurement instrumentation uncertainty sources	8
5	Evaluation of the uncertainty	9
5.1	Evaluation of the uncertainty through mathematical modelling	9
5.2	Determination of the uncertainty from interlaboratory tests	10
5.3	Determination (estimation) of uncertainties from field measurements	10
6	Presentation of results	11
7	Use of uncertainties	13
7.1	General	13
7.2	Use of uncertainties in comparisons	13
Annex A (informative)	Uncertainty in the measurement of hand-arm vibration at the workplace -- Example for determination of the measurement uncertainty of the vibration exposure during task-based measurements according to ISO 5349-2	14
Annex B (informative)	Example for determination of the measurement uncertainty of emission measurements on hand-held and hand-guided machines	25
Annex C (informative)	Typical errors	28
Annex D (informative)	Statistical background	30
