ISO 362-1:2022-11 (E)

Acoustics - Engineering method for measurement of noise emitted by accelerating road vehicles - Part 1: M and N categories

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2
3.1 Vehicle mass 2

4 Symbols, terms and abbreviated terms 7

5 Specification of the acceleration for vehicles of categories M1 and M2 having a maximum authorized mass not exceeding 3 500 kg and of category N1 10
5.1 General 10
5.2 Calculation of acceleration 11
5.2.1 Calculation procedure for vehicles with manual transmission, automatic transmission, adaptive transmission, and continuously variable transmission (CVT) tested with locked gear ratios 11
5.2.2 Calculation procedure for vehicles with automatic transmission, adaptive transmission, and CVT tested with non-locked gear ratios 11
5.3 Calculation of the target acceleration 12
5.4 Calculation of the reference acceleration 12
5.5 Partial power factor kP 13

6 Instrumentation 13
6.1 Instruments for acoustical measurement 13
6.1.1 General 13
6.1.2 Calibration 13
6.1.3 Conformity with requirements 14
6.2 Instrumentation for speed measurements 14
6.3 Meteorological instrumentation 14

7 Acoustical environment, meteorological conditions, and background noise 14
7.1 Test site 14
7.2 Meteorological conditions 16
7.3 Background noise 16

8 Test procedures 17
8.1 Microphone positions 17
8.2 Conditions of the vehicle 17
8.2.1 General conditions 17
8.2.2 Test mass of the vehicle 17
8.2.3 Tyre selection and condition 22
8.2.4 Calculation of total engine power 22
8.2.5 Battery state of charge 23
8.2.6 Additional sound emitting devices 23
8.2.7 Vehicle cooling fans or cooling systems 23
8.3 Operating conditions 23

8.3.1 Vehicles of categories M1 and M2 having a maximum authorized mass not exceeding 3 500 kg and category N1 23
8.3.2 Vehicles of category M2 having a maximum authorized mass exceeding 3 500 kg, and categories M3, N2 and N3 27
8.4 Measurement readings and reported values 31
8.4.1 General 31
8.4.2 Data compilation 32
8.4.3 Vehicles of categories M1 and M2 having a maximum authorized mass not exceeding 3 500 kg and category N1 32
8.4.4 Vehicles of category M2 having a maximum authorized mass exceeding 3 500 kg and categories M3, N2, and N3 33
8.5 Measurement uncertainty 33

9 Test report 34

Annex A (informative) Technical background for development of vehicle noise test procedure based on in-use operation in urban conditions 36

Annex B (informative) Measurement uncertainty -- Framework for analysis according to ISO/IEC Guide 98-3 56

Annex C (informative) Flowchart of the procedure for categories M1 and M2 having a maximum authorized mass not exceeding 3 500 kg and category N1 66

Annex D (informative) Flowchart for vehicles of category M2 having a maximum authorized mass exceeding 3 500 kg and categories M3, N2, and N3 with locked gears 71

Annex E (informative) Flowchart for vehicles of category M2 having a maximum authorized mass exceeding 3 500 kg and categories M3, N2, and N3 with non-locked gears 72

Annex F (informative) Flowchart for vehicles of category M2 having a maximum authorized mass exceeding 3 500 kg and categories M3, N2, and N3 with no rotational engine speed available 74
