DIN ISO 20816-3:2023-04 (E)

Mechanical vibration - Measurement and evaluation of machine vibration - Part 3: Industrial machinery with a power rating above 15 kW and operating speeds between 120 r/min and 30000 r/min (ISO 20816-3:2022)

National foreword 3

National Annex NA (informative) **Bibliography** 5

Foreword 7

Introduction 8

1 Scope 9

2 Normative references 10

3 Terms and definitions 11

4 Measurement procedures 11
4.1 General 11
4.2 Measurement location 11
4.3 Measurement equipment 14
4.4 Continuous and non-continuous monitoring 15
4.5 Operational conditions 15
4.6 Background vibration 16
4.7 Choice of measurement type 16

5 Machine classification 17
5.1 General 17
5.2 Classification according to machine type, rated power or shaft height 17
5.3 Classification according to support flexibility 17

6 Evaluation criteria 18
6.1 General 18
6.2 Criterion I: Vibration magnitude 18
6.2.1 General 18
6.2.2 Evaluation zones 19
6.2.3 Acceptance criteria 19
6.2.4 Evaluation zone limits 19
6.3 Criterion II: Change in vibration magnitude 19
6.4 Evaluation during transient operation 20
6.5 Operational limits 20
6.5.1 General 20
6.5.2 Setting ALARM values 21
6.5.3 Setting TRIP values 21
6.6 Supplementary procedures/criteria 21
6.7 Evaluation based on changes in vibration amplitude of specified frequency components and vibration vector information 21

Annex A (normative) **Evaluation criteria for vibration measured on non-rotating parts of coupled industrial machines under specified operating conditions** 23

Annex B (normative) **Evaluation criteria for shaft relative vibration of coupled industrial machines under specified operating conditions** 25

Annex C (informative) **Guidelines for considering the bearing clearance for the specification of evaluation criteria for shaft relative vibration of coupled industrial machines under specified operating conditions** 29

Annex D (informative) **Cautionary notes about the use of vibration velocity criteria at low rotational speeds** 30
