## Characterization of pavement texture by use of surface profiles - Part 4: One third octave band spectral analysis of surface profiles

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Symbols and abbreviated terms .....	4
5	Basic outline of methodologies of spatial frequency analysis .....	5
6	Sampling of surface profiles .....	7
6.1	Requirements concerning profilometers and data preparations .....	7
6.2	Sampling of road sections .....	7
6.3	Measurement of laboratory samples .....	7
6.4	Texture profile levels (logarithmic scale) .....	8
6.5	Anti-aliasing filtering .....	8
6.6	Drop-out correction and interpolation .....	8
6.7	Resampling to a constant spatial resolution .....	10
6.8	Spike identification and reshaping the profile .....	10
7	Spectral analysis in constant-percentage bandwidth bands (octave- or one-third-octave bands) by digital filtering .....	10
8	Uncertainty of analysis results .....	11
9	Reporting of analysis results .....	12
Annex A (normative) Uncertainty of spectral analysis results .....		13
Annex B (informative) Spectral analysis and profile asymmetry .....		18
Annex C (informative) Spectral analysis by means of discrete (fast) Fourier transform methods .....		19
Annex D (normative) Spike removal procedure .....		27
Annex E (informative) Testing the calculation procedure .....		30
Annex F (normative) Profile conditioning before filtering .....		32
Bibliography .....		35
