National Annex NA (informative) **Bibliography** 7

Foreword 8

Introduction 9

1 Scope 10

2 Normative references 10

3 Terms and definitions 10

4 Capacity and performance data of the balancing machine 10

4.1 General 10

4.2 Data for horizontal balancing machines 10

4.2.1 Rotor mass and unbalance limitations 10

4.2.2 Production efficiency 10

4.2.3 Rotor dimensions 12

4.2.4 Balancing machine drive data 13

4.2.5 Torque 13

4.2.6 Type of rotor drive 14

4.2.7 Brake 14

4.2.8 Motor and controls 14

4.2.9 Speed regulation 14

4.2.10 Couple moment interference ratio, I_{sc} 14

4.2.11 Air pressure requirements 14

4.3 Data for vertical balancing machines 14

4.3.1 Rotor mass and unbalance limitations 14

4.3.2 Production efficiency 15

4.3.3 Rotor dimensions 16

4.3.4 Balancing machine drive data 17

4.3.5 Torque 17

4.3.6 Type of drive to rotor 17

4.3.7 Brake 17

4.3.8 Motor and controls 17

4.3.9 Speed regulation 17

4.3.10 Couple moment interference ratio 17

4.3.11 Air pressure requirements 17

5 Machine features 17

5.1 Principle of operation 17

5.2 Machine arrangement 17

5.3 Measuring system 18

5.3.1 General 18

5.3.2 Unbalance indicators 18

5.3.3 Additional features 18

5.3.4 Operation of the indicating system 19

5.4 Plane separation system 19

5.4.1 Multi-plane balancing machines 19

5.4.2 Single-plane horizontal or vertical balancing machines 19

5.5 Setting and calibration of the measuring system 19

5.5.1 General 19

5.5.2 Soft-bearing machines 20

5.5.3 Hard-bearing machines 20

6 Production efficiency **20**
6.1 General 20
6.2 Time per balance cycle 21
6.3 Unbalance reduction ratio, R_{UR} 22

7 Performance qualifying factors **23**

8 Installation requirements **23**
8.1 General 23
8.2 Supply requirements 23
8.3 Foundation 24

9 Proving rotors and test masses **24**
9.1 General 24
9.2 Standardized proving rotors 24
9.3 User defined proving rotors 26
9.4 Test masses 26
9.4.1 General 26
9.4.2 U_{mar} test masses 33
9.4.3 R_{UR} test masses 34
9.4.4 Permissible test mass errors 35
9.4.5 Material 36

10 Balance machine verification tests **36**
10.1 General 36
10.2 Requirements for evaluating balance machine performance 37
10.3 Test speed 38
10.4 Test for establishing the minimum achievable residual unbalance, U_{mar} 38
10.4.1 General 38
10.4.2 Initial balancing machine setting 38
10.4.3 Unbalance added 40
10.4.4 Readings 41
10.4.5 Correction 41
10.4.6 Reference change 41
10.4.7 Plane setting for U_{mar} test 41
10.4.8 Test runs 41
10.4.9 U_{mar} evaluation 41
10.5 Test for unbalance reduction ratio, R_{UR} 42
10.5.1 R_{UR} tests on single-plane balancing machines 42
10.5.2 R_{UR} tests on two-plane balancing machines 42
10.5.3 General 42
10.5.4 Test data sheet completion 45
10.5.5 Plane setting 45
10.5.6 R_{UR} test runs 45
10.5.7 Plotting R_{UR} test data 46
10.5.8 Evaluation 50
10.6 Test for couple moment interference on single-plane machines 51
10.6.1 Starting point 51
10.6.2 Procedure 51
10.6.3 Evaluation 51
10.7 Compensator test 51
10.7.1 Initial point 51
10.7.2 Procedure 51
10.7.3 Evaluation 52
10.8 Simplified tests 52
10.8.1 General 52
10.8.2 Simplified U_{mar} test 52
10.8.3 Simplified R_{UR} test 53

Annex A (informative) **Information provided by the user to the balancing machine manufacturer** **54**

Annex B (informative) R_{UR} **limit diagrams** **59**

Annex C (informative) **Shafts of outboard Type C proving rotors** **62**

Annex D (informative) **User defined proving rotors for special cases including using a user production part** **64**

Annex E (informative) **Modifications to proving rotors prepared in accordance with ISO 2953 to this document** **65**

Annex F (informative) **Optional repeatability test** **67**

Annex G (informative) **Optional speed range test** **69**

Bibliography **70**
