## Mechanical vibration - Ground-borne noise and vibration arising from rail systems - Part 34: Characterizing irregularity of the running surfaces with respect to vibration excitation

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Characterizing roughness related to vibration excitation .....	3
4.1	Roughness and noise or vibration phenomena .....	3
4.2	Roughness spectrum .....	3
4.3	Roughness level .....	3
4.4	Roughness wavelength range .....	4
4.5	Characterization of roughness .....	5
5	Principles of measurement and analysis .....	5
Annex A (informative) Characterization of localized geometrical features .....		8
Annex B (informative) Measuring equipment .....		9
Annex C (informative) Processing of roughness profiles in site-specific cases .....		12
Bibliography .....		13
