ISO 17201-2:2025-07 (E)

Acoustics - Noise from shooting ranges - Part 2: Calculation of muzzle blast

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1
3.1 General 1
3.2 Directivity 3
3.3 Energy 3
3.4 Fraction 4
3.5 Projectile 5

4 Estimation model for source data of the muzzle blast 5
4.1 General 5
4.2 Estimation of chemical energy 5
4.3 Estimation of acoustic energy 6
4.4 Estimation of the Weber energy 6
4.5 Estimation of directivity 6
4.6 Estimation of the spectrum 6

5 Uncertainty of estimation 7

6 Report 8

Annex A (informative) Simple blast model for estimation of sound energy and its spectrum 9

Annex B (informative) Quality of input data 11

Annex C (informative) Comparison between measurements and prediction of muzzle blast 14

Bibliography 21
