## Acoustics - Measurement and parametric description of spatial sound distribution curves in workrooms for evaluation of their acoustical performance

---

Contents	Page
Foreword .....	iv
Introduction .....	v
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	1
4 Sound distribution in a room .....	3
4.1 General .....	3
4.2 Spatial sound distribution curves .....	3
5 Measurement of the spatial sound distribution curve .....	5
5.1 Specifications regarding the sound source used for the test .....	5
5.2 Measurement instrumentation .....	6
5.3 Measurement path and points .....	7
5.4 Measurement procedure .....	8
5.5 Representation of the measured data .....	8
6 Parametric description of the measured spatial sound distribution curve in view of evaluation of the acoustical performance of workrooms .....	9
6.1 General .....	9
6.2 Distance ranges .....	9
6.3 Determination of the rate of spatial decay of sound pressure levels per distance doubling, DL <sub>2</sub> .....	9
6.4 Determination of the excess of sound pressure level with respect to a reference sound distribution curve, DL <sub>f</sub> .....	10
6.5 Evaluation of measured data .....	12
7 Information to be recorded and reported .....	12
Annex A (normative) Performance requirements for the sound source to be used for the test .....	14
Annex B (normative) Correction of measured sound distribution curves to account for differences in ground reflections and source directivity .....	16
Annex C (informative) Example of use of this International Standard .....	17
Bibliography .....	25
