Foreword 2

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Quantities to be measured and quantities to be determined 6

5 A-weighted sound power level determination 6

6 A-weighted emission sound pressure level measurement at the operator position 7
6.1 General 7
6.2 Requirements for artificial surface 8
6.3 Requirements for ground 8
6.4 Requirements for concrete floor covered with sawdust 8

7 Installation, mounting and operating conditions 8

8 Information to be recorded and reported 9

9 Declaration of noise emission values 9

Annex A (normative) Specific conditions for chain-saws 10

Annex B (normative) Specific conditions for brush-cutters and grass-trimmers 17

Annex C (informative) Example of water brake mounted on chain-saw bar to simulate cutting 25

Annex D (informative) A-weighted sound power level determination according to European Directive on noise from machines used outdoors, 2000/14/EC 26

Bibliography 27
