ISO 19973-1:2007-08 (E)

Pneumatic fluid power - Assessment of component reliability by testing - Part 1: General procedures

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and units of measurement 3

5 Concept of reliability 3

6 Strategies for conducting testing 4
6.1 Accelerated life testing 4
6.2 Test stand and measurement of parameters 4
6.3 Test planning 4

7 Statistical analysis 4

8 Test conditions 4

9 Sample size and selection criteria 5

10 End of test 5
10.1 Minimum number of failures required 5
10.2 Termination cycle count 6
10.3 Suspended test unit 6
10.4 Censored test 6
11 Evaluation of reliability characteristics from the test data 6
12 Test report 8
13 Identification statement (reference to this part of ISO 19973) 8

Annex A (informative) Calculation procedures for censored data without suspensions 9

Annex B (informative) Calculation procedures for censored data with suspensions 14

Annex C (informative) Verification of minimum life at a specified reliability and one-sided confidence level 21

Annex D (informative) Dealing with outliers in test data 26
