ISO 17165-1:2007-10 (E)

Hydraulic fluid power - Hose assemblies - Part 1: Dimensions and requirements

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Designation 3

5 Hose types, nominal inside diameters and maximum working pressures, and correspondence of hose sizes to tube sizes 5

6 Dimensions of hose and hose fittings 5

7 Overview of hose type, type of hydraulic fluid and temperature range 5

8 Summary of hose fitting end forms and key dimensions 6

9 Requirements for manufacturing instructions for hose assemblies 16

10 Tolerances on hose assembly length and rotational angle 16

11 Pressure drop of hose assemblies 16

12 Requirements and tests 17

13 Marking 17

Annex A (informative) Maximum working pressures of hoses 18

Annex B (informative) Dimensions of steel tubes to be used in combination with hose types listed in Table A.1 20
