ISO 16369:2007-10 (E)

Elevating work platforms - Mast-climbing work platforms

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 3

4 List of hazards 7

5 Safety requirements and/or measures 10
5.1 Structural and stability calculations 10
5.2 General requirements for machine, base frame, chassis and mast 18
5.3 Work platform 22
5.4 Drive systems for elevation 24
5.5 Means to prevent the work platform from falling with overspeed 29
5.6 Means for emergency lowering and raising the work platform 31
5.7 Overload/moment device 32
5.8 Electrical systems 33
5.9 Drive systems powered by internal combustion engine 34
5.10 Hydraulic system 35
5.11 Special requirements for safety devices depending on auxiliary circuits, and for overload/moment detection devices 36
5.12 Travel limit switches 36
5.13 Controls 36

6 Verification of safety requirements and/or measures for each new model of MCWP 37
6.1 Design check 37
6.2 Practical tests 37

7 Information to be provided 39
7.1 Instruction handbook 39
7.2 Marking 46

Annex A (informative) Structural calculations 47

Annex B (normative) Special requirements for multilevel work platforms 63

Annex C (normative) Requirements for electrical and electronic aspects for overload-detection devices 65

Bibliography 68
