## Hydraulic fluid power - Fatigue pressure testing of metal pressure-containing envelopes - Part 2: Rating methods

---

| <b>Contents</b>  |   | <b>Page</b> |
|--|---|-------------|
| Foreword .....   |   | iv          |
| Introduction .....   |   | v           |
| 1  | Scope .....   | 1           |
| 2  | Normative references .....  | 1           |
| 3  | Terms and definitions .....   | 2           |
| 4  | Selection of material factors .....   | 2           |
| 5  | Determination of cyclic test pressure .....   | 2           |
| 6  | Conduct of fatigue test .....   | 3           |
| 7  | Rating by similarity .....  | 4           |
| 8  | Rating declaration .....  | 4           |
| 9  | Identification statement (reference to this part of ISO 10771) .....  | 4           |
| Annex A (informative) Material factor database .....             |   | 5           |
| A.1  | Values of coefficient of variation, $k_o$ , for commonly used metals .....  | 5           |
| A.2  | Procedures used to establish values of coefficient of variation, $k_o$ , for the metals listed in Table A.1 ..... | 5           |
| Annex B (normative) Calculation of variability factor KV .....   |   | 13          |
| B.1  | General .....   | 13          |
| B.2  | Method .....  | 13          |
| Annex C (informative) Proposal for an acceleration factor .....  |   | 15          |
| C.1  | General .....   | 15          |
| C.2  | Extrapolating data to 107 cycles .....  | 15          |
| C.3  | Examples .....  | 19          |
| Annex D (informative) Basis of fatigue pressure rating [9] ..... |   | 21          |
| D.1  | Basis of pressure rating .....  | 21          |
| D.2  | Statistical analysis theory .....   | 22          |
| D.3  | Fatigue distribution data .....   | 28          |
| D.4  | Data calculation example .....  | 33          |
| D.5  | Raw data points for sample problem .....  | 39          |
| Bibliography .....   |   | 40          |
