

DIN EN 14462:2010-02 (E)

Surface treatment equipment - Noise test code for surface treatment equipment including its ancillary handling equipment - Accuracy grades 2 and 3 (includes Amendment A1:2009)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Description of machinery family	8
5	Emission sound pressure level determination	8
5.1	Selection of measurement method	8
5.2	Selection of relevant work station(s) and other specified positions	8
5.3	Selection of measuring points for very large machines	9
5.4	Measurement uncertainties	9
6	Sound power level determination	9
6.1	Selection of measurement method	9
6.2	Method for very large machines	10
6.3	Measurement uncertainty	10
7	Installation and mounting conditions	10
8	Operating conditions	10
9	Information to be recorded	11
10	Information to be reported	11
11	Declaration and verification of noise emission values	12
Annex A (normative)	List of surface treatment machines covered by this noise test code and further requirements	14
Annex B (normative)	Additional requirements for open-fronted spray booths and enclosed spray booths	20
Annex C (informative)	Example for the determination of the emission values for a machine without a defined work station	23
Annex ZA (informative)	Relationship between this European Standard and the Essential Requirements of EU directive 98/37/EC	29
Annex ZB (informative)	!!!!Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC""""	30
