

ISO 2314:2009-12 (E)

Gas turbines - Acceptance tests

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	2
3	Terms and definitions	3
4	Test boundary	6
5	Symbols	8
6	Preparation for tests	12
6.1	General	12
6.2	Test procedure	13
6.3	Test preparation	14
6.4	Instruments and measuring methods	16
7	Conductance of test	29
7.1	Specified reference conditions	29
7.2	Preliminary checks	32
7.3	Starting and stopping of tests	32
7.4	Operation prior and during test	33
7.5	Duration of tests	35
7.6	Maximum permissible variations in operating conditions	35
7.7	Test records	36
7.8	Test validity	37
8	Computation of results	37
8.1	Performance test results	37
8.2	Correction of test results to reference conditions	40
8.3	Other gas turbine performance parameters	46
9	Test report	55
Annex A (informative) Uncertainty		56
Annex B (informative) Example calculation of exhaust mass flow rate and turbine inlet temperature energy balance calculation		68
Bibliography		106
