

ISO 2314:2009-12 (E)

Gas turbines - Acceptance tests

| Contents | | Page |
|---|--|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 2 |
| 3 | Terms and definitions | 3 |
| 4 | Test boundary | 6 |
| 5 | Symbols | 8 |
| 6 | Preparation for tests | 12 |
| 6.1 | General | 12 |
| 6.2 | Test procedure | 13 |
| 6.3 | Test preparation | 14 |
| 6.4 | Instruments and measuring methods | 16 |
| 7 | Conductance of test | 29 |
| 7.1 | Specified reference conditions | 29 |
| 7.2 | Preliminary checks | 32 |
| 7.3 | Starting and stopping of tests | 32 |
| 7.4 | Operation prior and during test | 33 |
| 7.5 | Duration of tests | 35 |
| 7.6 | Maximum permissible variations in operating conditions | 35 |
| 7.7 | Test records | 36 |
| 7.8 | Test validity | 37 |
| 8 | Computation of results | 37 |
| 8.1 | Performance test results | 37 |
| 8.2 | Correction of test results to reference conditions | 40 |
| 8.3 | Other gas turbine performance parameters | 46 |
| 9 | Test report | 55 |
| Annex A (informative) Uncertainty | | 56 |
| Annex B (informative) Example calculation of exhaust mass flow rate and turbine inlet temperature energy balance calculation | | 68 |
| Bibliography | | 106 |
