

DIN EN ISO 13349:2010-12 (E)

Industrial fans - Vocabulary and definitions of categories (ISO 13349:1999)

Contents		Page
Foreword		4
Introduction		4
1	Scope	5
2	Normative references	5
3	Definitions	5
4	Units and symbols	10
4.1	Multiples of primary units	11
4.2	Units of time	11
4.3	Temperature of air/gas	11
5	Fan categories	11
5.1	General	11
5.2	Suitability for the fan pressure	11
5.2.1	Work per unit mass	11
5.2.2	Fan categories	12
5.2.3	Changes in air density	12
5.3	Suitability of construction	12
5.3.1	Categorization according to casing construction	12
5.3.2	Designation for hot-gas fan	13
5.3.3	Designation and recommended categorization for smoke-ventilating fans (see 3.7.2.2)	13
5.3.4	Categorization for gas-tight fans (see 3.7.2.4)	14
5.3.5	Categorization for ignition-protected fans (see 3.7.2.10)	14
5.4	Drive arrangements	16
5.5	Inlet and outlet conditions	20
5.6	Method of fan control	20
5.7	Designation of direction of rotation and position of parts of the fan assembly	21
5.7.1	Direction of rotation	21
5.7.2	Outlet position of a centrifugal fan	21
5.7.3	Position of component parts of a centrifugal fan with volute casing	21
5.7.4	Position of component parts of an axial-flow, mixed-flow or other fan with coaxial inlet and outlet	21
5.7.5	Position of motor or other prime mover	22
5.8	Characteristic dimensions and component parts	22
5.8.1	Characteristic dimensions	22
5.8.2	Terms for fan component parts	22
Annex A (informative) Examples		40
A.1	Example 1: Centrifugal fan	40
A.2	Example 2: Axial-flow fan	40
