ISO 5049-1:1994-07 (E)

Mobile equipment for continuous handling of bulk materials - Part 1: Rules for the design of steel structures

Contents

Page

1 Scope 1
2 Normative references 1
3 Loads 1
3.1 Main loads 2
3.2 Additional loads 4
3.3 Special loads 8
4 Load cases 9
5 Design of structural parts for general stress analysis 10
5.1 General 10
5.2 Characteristic values of materials 10
5.3 Calculation of allowable stresses with respect to the yield point 11
5.4 Checking of framework elements submitted to compression loads 11
6 Design of joints for general stress checking 13
6.1 Welded joints 13
6.2 Bolted and riveted joints 15
6.3 Joints using high-strength friction-grip (HSFG) bolts with controlled tightening 17
6.4 Cables 20
7 Calculation of allowable fatigue strength for structural members and for joints 20
7.1 General 20
7.2 Allowable stress, u0 20
7.3 Characteristic curves for allowable fatigue strength 21
8 Exceeding allowable stresses 46
9 Safety against overturning 46
9.1 Checking for safety against overturning 46
9.2 Additional precautions 46
10 Safety against drifting 46
