# DIN 743-2:2012-12 (E)

## Calculation of load capacity of shafts and axles - Part 2: Theoretical stress concentration factors and fatigue notch factors

## Contents

Page

1 Scope ..... 5
2 Normative references ..... 5
3 Symbols, designations and units ..... 5
4 Fatigue notch factor ..... 6
4.1 Definition of fatigue notch factor ..... 6
4.2 Experimentally determined fatigue notch factors ..... 6
4.2.1 Parallel keyway and interference fit ..... 6
4.2.2 Fatigue notch factors for splined shafts, serrated shafts and involute spline shafts ..... 8
4.2.3 Fatigue notch factors for round bars with V-notch ..... 10
4.2.4 Fatigue notch factors for circumferential rectangular notch ..... 11
4.3 Fatigue notch factors for notches with known stress concentration factor ..... 12
4.3.1 Shoulder, U-notch, shoulder with undercut, transverse hole ..... 12
4.3.2 Notch cases not yet dealt with ..... 14
5 Stress concentration factors ..... 14
5.1 Definition of stress concentration factor ..... 14
5.2 Stress concentration factors for different notch shapes ..... 15
5.2.1 Shoulder and U-notch ..... 15
5.2.2 Shoulder with undercut ..... 22
5.2.3 Transverse hole ..... 23
6 Size influence factors ..... 24
6.1 General information ..... 24
6.2 Technological size influence factor $K_1(d_{eff})$ ..... 24
6.3 Geometrical size influence factor $K_2(d)$ ..... 26
6.4 Geometrical size influence factor $K_3(d)$ ..... 27
7 Influence factor for surface roughness $K_{F\sigma,\tau}$ ..... 28
8 Influence factor for surface conditioning $K_V$ ..... 30
Bibliography ..... 34

### Figures

Figure 1— Fatigue notch factors for splined shafts, serrated shafts and involute spline shafts ..... 8
Figure 2 — Fatigue notch factors for round bars with circumferential V-notch [2] ..... 10
Figure 3 — Circumferential rectangular notch for circlips according to DIN 471 and structural radius $\rho^*$ according to Neuber [9] ..... 11
Figure 4 — Sensitivity factor $n$ ..... 13
Figure 5 — Stress concentration factors for notched round bars in tension ..... 16
Figure 6 — Stress concentration factors for notched round bars in bending ..... 17
Figure 7 — Stress concentration factors for notched round bars in torsion ..... 18
Figure 8 — Stress concentration factors for shouldered round bars in tension ..... 19
Figure 9 — Stress concentration factors for shouldered round bars in bending ..... 20
Figure 10 — Stress concentration factors for shouldered round bars in torsion ..... 21
