DIN 743 Beiblatt 2:2012-12 (E)

Calculation of load capacity of shafts and axles - Supplement 2: Examples to part 4

Contents

Page

Foreword ... 3

1 Normative references ... 4

2 Symbols, designations and units ... 4

3 Application examples taking into account a load spectrum ... 5

3.1 Calculation of the factor of safety against fatigue failure for a shouldered shaft in bending in the fatigue strength domain, according to DIN 743 Supplement 1, example 3.1 ... 5

3.2 Calculation of the factor of safety against fatigue failure for a shaft with parallel keyway in bending and constant torsion in the limited life strength domain, according to DIN 743 Supplement 1, example 3.2 ... 6

3.3 Calculation of the load spectrum factor $K_{K\sigma,\tau}$ in a two-bin spectrum and calculation of the factor of safety against fatigue failure in case of bending and torsion in the fatigue strength domain ... 8
