DIN EN ISO 9906:2013-03 (E)

Rotodynamic pumps - Hydraulic performance acceptance tests - Grades 1, 2 and 3 (ISO 9906:2012)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions, symbols and subscripts 5
3.1 Terms and definitions 5
3.2 Terms relating to quantities 7
3.3 Symbols and subscripts 13

4 Pump measurements and acceptance criteria 14
4.1 General 14
4.2 Guarantees 15
4.3 Measurement uncertainty 15
4.4 Performance test acceptance grades and tolerances 19
4.5 Default test acceptance grades for pump application 25

5 Test procedures 26
5.1 General 26
5.2 Date of testing 26
5.3 Test programme 26
5.4 Testing equipment 26
5.5 Records and report 26
5.6 Test arrangements 27
5.7 Test conditions 27
5.8 NPSH tests 27

6 Analysis 30
6.1 Translation of the test results to the guarantee conditions 30
6.2 Obtaining specified characteristics 31

Annex A (normative) Test arrangements 32

Annex B (informative) NPSH test arrangements 41

Annex C (informative) Calibration intervals 44

Annex D (informative) Measurement equipment 45

Annex E (informative) Tests performed on the entire equipment set -- String test 50

Annex F (informative) Reporting of test results 52

Annex G (informative) Special test methods 56

Annex H (informative) Witnessed pump test 57

Annex I (informative) Conversion to SI units 58

Annex J (informative) Measurement uncertainty for NPSH test 60

Bibliography 61
