

DIN EN 16590-2:2014-11 (E)

Tractors and machinery for agriculture and forestry - Safety-related parts of control systems - Part 2: Concept phase (ISO 25119-2:2010 modified)

Contents	Page
Foreword	5
Introduction	6
1 Scope	8
2 Normative references	8
3 Terms and definitions	8
4 Abbreviated terms	8
5 Concept -- Unit of observation	9
5.1 Objectives	9
5.2 Prerequisites	9
5.3 Requirements	9
5.3.1 Unit of observation and ambient conditions	9
5.3.2 Limits of unit of observation and its interfaces with other units of observation	10
5.3.3 Sources of stress	10
5.3.4 Additional determinations	10
5.4 Work products	11
6 Risk analysis and method description	11
6.1 Objectives	11
6.2 Prerequisites	11
6.3 Requirements	11
6.3.1 Procedures for preparing a risk analysis	11
6.3.2 Tasks in risk analysis	11
6.3.3 Participants in risk analysis	11
6.3.4 Assessment and classification of a potential harm	11
6.3.5 Assessment of exposure in the situation observed	12
6.3.6 Assessment of a possible avoidance of harm	12
6.3.7 Selecting the required AgPLr	13
6.4 Work products	15
7 System design	15
7.1 Objectives	15
7.2 Prerequisites	15
7.3 Requirements	15
7.3.1 Assignment of AgPL	15
7.3.2 Achieving the required AgPLr	16
7.3.3 Achievement of the performance level	17
7.4 Work products	17
Annex A (normative) Designated architectures for SRP/CS	18
A.1 General	18
A.2 Category B (basic)	18
A.3 Category 1	19
A.4 Category 2	19
A.5 Category 3	20

A.6	Category 4	22
Annex B (informative) Simplified method to estimate channel MTTFdC 24		
B.1	General	24
B.2	Component MTTFd values	24
B.2.1	Determination of component MTTFd values	24
B.2.2	MTTFd for components from B10	25
B.3	Parts count method	25
B.4	Calculation of symmetric MTTFdC for two-channel architectures	26
Annex C (informative) Determination of diagnostic coverage (DC) 27		
C.1	General	27
C.2	Estimation of the required DC	27
C.3	Estimation of channel DC	29
C.4	Calculation of channel DC	30
C.5	Calculation of DC	30
Annex D (informative) Estimates for common-cause failure (CCF) 31		
Annex E (informative) Systematic failure 33		
E.1	General	33
E.2	Procedure for the control of systematic failures	33
E.3	Procedure for the avoidance of systematic failures	33
Annex F (informative) Characteristics of safety functions 36		
F.1	General	36
F.2	Start interlock	36
F.3	Stop function	36
F.4	Manual reset	36
F.5	Start and restart	37
F.6	Response time	37
F.7	Safety-related parameters	37
F.8	External control function	37
F.9	Muting (manual suspension of safety functions)	37
F.10	Operator warning	37
Annex G (informative) Example of a risk analysis 38		
G.1	Workflow	38
G.2	Example risk analysis of an electro-hydraulic transmission for a self-propelled working machine (forage harvester) -- Extract from a complete risk analysis	38
G.2.1	System description	38
G.2.2	Surrounding conditions	39
G.2.3	System states and transitions	39
G.2.4	System failures	40
G.3	Assessment	41
G.3.1	System failure -- Stops unintentionally	41
G.3.2	System failure -- Does not move when commanded	42
G.4	Results	42
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Machinery Directive 2006/42/EC 43		
Bibliography 44
