DIN EN 13001-1:2015-06 (E)

Cranes - General design - Part 1: General principles and requirements

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions, symbols and abbreviations 5
3.1 Terms and definitions 5
3.2 Symbols and abbreviations 6

4 Safety requirements and/or measures 8
4.1 General 8
4.2 Proof calculation 8
4.2.1 General principles 8
4.2.2 Models of cranes and loads 11
4.2.3 Simulation of load actions 11
4.2.4 Load combinations and load effects 11
4.2.5 Limit states 12
4.2.6 Proof of competence 12
4.2.7 Methods for the proof of competence 13
4.3 Classification 15
4.3.1 General 15
4.3.2 Total numbers of working cycles 16
4.3.3 Average linear or angular displacements 17
4.3.4 Frequencies of loads 19
4.3.5 Positioning of loads 20
4.4 Stress histories 21
4.4.1 General 21
4.4.2 Frequencies of stress cycles 22
4.4.3 Transformation of the identified stress cycles into cycles with constant mean stress or constant stress ratio 23
4.4.4 Classification of stress histories 25

Annex A (informative) Selection of a suitable set of crane standards for a given application 28

Annex B (informative) Discreet and continuous distributions 30

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC 33

Bibliography 34
