

DIN EN 13001-1:2015-06 (E)

Cranes - General design - Part 1: General principles and requirements

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms, definitions, symbols and abbreviations	5
3.1	Terms and definitions	5
3.2	Symbols and abbreviations	6
4	Safety requirements and/or measures	8
4.1	General	8
4.2	Proof calculation	8
4.2.1	General principles	8
4.2.2	Models of cranes and loads	11
4.2.3	Simulation of load actions	11
4.2.4	Load combinations and load effects	11
4.2.5	Limit states	12
4.2.6	Proof of competence	12
4.2.7	Methods for the proof of competence	13
4.3	Classification	15
4.3.1	General	15
4.3.2	Total numbers of working cycles	16
4.3.3	Average linear or angular displacements	17
4.3.4	Frequencies of loads	19
4.3.5	Positioning of loads	20
4.4	Stress histories	21
4.4.1	General	21
4.4.2	Frequencies of stress cycles	22
4.4.3	Transformation of the identified stress cycles into cycles with constant mean stress or constant stress ratio	23
4.4.4	Classification of stress histories	25
Annex A (informative) Selection of a suitable set of crane standards for a given application		28
Annex B (informative) Discreet and continuous distributions		30
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC		33
Bibliography		34
