

DIN EN ISO 16891:2016-12 (E)

Test methods for evaluating degradation of characteristics of cleanable filter media (ISO 16891:2016)

Contents		Page
European foreword		3
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Symbols and abbreviated terms	9
5	Principle	10
6	Test specimen, equipment and test procedure	11
6.1	General	11
6.2	Preparation of sheets for gas exposure	12
6.2.1	Shape and size of tensile specimen	12
6.2.2	Sample sheet for exposure	12
6.2.3	Selection of sample sheet through air permeability measurement	13
6.2.4	Filter media for exposure	13
6.3	Sample preparation	14
6.3.1	Exposure system	14
6.3.2	Heating system	16
6.3.3	Test gas supply system	16
6.3.4	Gas analyzer	16
6.3.5	Gas treatment device	17
6.4	Exposure conditions and procedures	17
6.4.1	Exposure conditions	17
6.4.2	Exposure period and number of exposure	17
6.4.3	Attachment of filter sample sheets in the sample case	18
6.4.4	Implementation of the exposure	18
7	Tensile strength measurement of exposed specimen	19
7.1	Tensile test device	19
7.2	Preparation of a tensile test specimen	19
7.3	Method of tensile test	19
7.4	Characterization of the degradation	20
8	Test report	21
Annex A (informative) Causes and results of degradation of fabrics		22
Annex B (informative) Possible evaluation method for characteristic change of fabrics		23
Annex C (informative) Theoretical consideration of degradation mechanism		24
Annex D (informative) Determination of specimen size		27
Annex E (informative) Experimental setup for gas exposure		31
Annex F (informative) Service temperature of filter materials		35
Annex G (informative) Examples of measured data of fabric at different circumstances		36
Annex H (informative) Example of test report		42
Bibliography		46
