

ISO 11943:1999-08 (E)

Hydraulic fluid power - On-line automatic particle-counting systems for liquids - Methods of calibration and validation

Contents		Page
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Units of measurements	1
5	Prerequisite	2
6	Test equipment	2
7	Accuracy of measuring equipment and test conditions	2
8	Off-line calibration procedure	3
9	Validation of on-line sample preparation equipment and determination of secondary calibration standard	3
10	On-line secondary calibration and verification procedure	6
11	On-line dilution system validation	10
12	Precautions	12
13	Identification statement	13
Annex A (informative) Typical on-line calibration and validation system design information guide ...		14
Annex B (informative) Hydraulic circuit design information guide for on-line counter adaptation to a Multipass test stand		16
Annex C (informative) Summary of ISO round robin study for on-line calibration and validation		20
